Vector Cuatro | Wind services

Vector Cuatro's wind services cover **all areas of a project's operation, both on the technical and commercial sides**. The knowledge, background and experience of the company, combined with the large dimension of our worldwide managed portfolio, allows the Firm to offer a high added-value service at a very competitive price.

Managing a **298 MW** wind energy portfolio in **Spain, France, Italy and the UK**, including technology from the major turbine manufacturers. The asset management service includes both technical activities (plant's operation, monitoring & performance analysis, HSE, etc.) and commercial management of the project companies.

Providing **engineering services for wind projects** totaling **1,300 MW** in technical due diligence, project development and resource studies, among others.

Giving **advisory and financial analysis** services for the acquisition and sale of wind energy projects

The logo features two overlapping triangles: a blue one on the left and a green one on the right. The text 'vectorcuatro' is centered within the green triangle, with a small white icon of a hand holding a pen to the right of the word. The background is a light gray with a pattern of various sized, semi-transparent triangles in shades of blue and green.
